

TECHNICAL DATA SHEET (TDS)

UNICSHINE LIQUID Marble Polisher

1. PRODUCT DESCRIPTION

UNICSHINE LIQUID is a ready-to-use polishing and restoration cream specially formulated for calcareous stones. It restores a high-gloss, factory-finish appearance with minimum equipment.

UNICSHINE LIQUID helps remove minor scratches, stains, and surface imperfections while providing a high degree of polish and enhanced surface appearance.

2. COVERAGE ESTIMATE

Approximately 1,000–1,200 sq. ft. per bottle.

Coverage may vary depending on the type, condition, porosity, and surface finish of the stone, as well as the application method.

APPLICATION PROCEDURE

- A small-area patch test is highly recommended before full-scale application.
- Protect adjacent surfaces and areas that are not intended to be treated.
- Shake the bottle thoroughly before use.
- Dampen the clean surface with water and apply approximately 30 mL of UNICSHINE LIQUID per 15 sq. ft.
- Add a suitable amount of water to the cream to form a flowing slurry.
- Polish using a low-speed polishing machine with a suitable polishing pad.
- Most surfaces require approximately 4–5 passes in different directions. However, stone composition and surface condition may vary; therefore, the patch test should be used to determine the appropriate procedure for each application.
- Once the desired level of polish is achieved, vacuum the slurry immediately. Flood-rinse the area with clean water, vacuum the rinse water, and towel-dry the surface thoroughly.
- After completing the polishing process, clean the entire area with clean water or a mild soap solution. Vacuum or towel-dry properly.
- Avoid allowing slurry to come into contact with an already repolished area, as this may cause staining.

4. APPLICATION AREA

SUNICSHINE LIQUID is suitable for use on:

- Marble
- Polished Limestone
- Travertine
- Terrazzo
- Other Calcareous Stones

5. STORAGE & SHELF LIFE

Approximately 12 months when stored in the original, tightly sealed container in a cool, dry, and well-ventilated environment below 25°C. Protect from direct sunlight, moisture, and extreme temperatures.

6. TECHNICAL INFORMATION

Property	Specification
Appearance	: White, opaque, cream-like liquid
Odour	: Mild, characteristic
Density	: $1.4 \pm 0.1 \text{ g/cm}^3$
pH	: 0.5–1.0

7. CAUTION

- Black marble: Use with extra care; patch test recommended.
- Green & some white marbles: Test before full application.
- Mildly acidic: Wear suitable PPE during application.
- Damaged surfaces: Resurface before polishing.
- Always conduct a patch test and follow recommended application procedures.
